BULL NK 3-0-12

PROMOTES FRUIT RIPENING

The BULL LINE is a range of highly-soluble liquid fertilizers, made of products with particular formulations that have been studied to perform in soils with very different pH levels. The BULL LINE includes both simple liquid fertilizers, in which there is only one macro-element to best dose the nutritional inputs according to the crop requirements, and complex liquid fertilizers, characterized by excellent stability and extreme ease of use.

BULL NK 3-0-12 is a NK binary fertilizer from the BULL LINE with a ratio between the two macroelements of 1: 4. It is recommended during the fruit growing phase, both on horticultural and fruit crops. The high potassium content favors an indirect defense against parasitic attacks and enhances the "mechanical" resistance of the tissues.

| CROP | TIME OF APPLICATIO | TIME OF APPLICATION | | DOSE/HECTARE* | | |
|---|------------------------------------|---------------------|---------------------------------|---------------|-------------|--|
| All crops | Ripening inducer | Ripening inducer | | | 25-30 kg | |
| COMPOSITION | | | PHYSICO-CHEMICAL FEATURES | | | |
| Total nitrogen (N) | | 3.00% | LIQUID | | | |
| Nitric nitrogen (N) | | 1.00% | pH (sol 1%) | | 7.0 | |
| Ammoniacal nitrogen (N) | | 2.00% | Conductivity E.C. μS/cm (1‰) | | 200 | |
| Potassium oxide (K ₂ O) soluble in water | | 12.00% | Density (g/cm³)/Specific weight | | 1.18 | |
| Sulfuric anhydride (| SO ₃) soluble in water | 5.50% | METHOD OF USE | | -417- | |
